

Cedarkirk *A place apart to build up the body of Christ in love.*

CAMP & CONFERENCE CENTER

GUEST INFORMATION SHEET | COVID-19

We are excited you are considering attending your group's event at Cedarkirk. It's likely you have questions about how Cedarkirk is handling health and safety during this pandemic. The safety of our staff, guests, and campers has always been our first priority, and remains so in the challenging times we find ourselves in now. Read on to find out how we're keeping you safe.

WHAT WE'RE DOING TO KEEP YOU SAFE:

In addition to now-familiar protocols like physical distancing and frequent sanitizing, we aim to minimize interactions with any persons who aren't guests or staff. Anyone entering camp will be subject to a brief health screening.

- All Cedarkirk staff complete a health screening prior to each work day or shift.
- Delivery and service personnel are not permitted in buildings unless they have completed a health screening.
- Staff adhere to physical distancing guidelines and wear masks when interacting with guests.
- Enhanced cleaning procedures ensure that common areas and frequently-touched surfaces are sanitized even more regularly.
- Dining rooms have been adjusted to keep guests spread out, and guest groups separated from one another.
- Food service procedures have been amended to eliminate common sources (like salad bars) and reduce the number of guests entering the serving hall.
- Program equipment is regularly sanitized. Common items (harnesses, archery bows, etc.) are sanitized after each individual use.
- Encouraging guest group leaders to keep family units together and spread guests out when assigning housing.

GUEST SCREENING:

Upon your arrival at Cedarkirk, a Cedarkirk staff member or your group's leader will conduct a brief health screening.

- The screening will consist of a few questions and a temperature reading. Any person registering a fever or presenting COVID-like symptoms will be asked to go home.
- If you or anyone in your family is experiencing symptoms of illness (specifically: shortness of breath, fever above 100.2, dry cough, nausea, diarrhea, loss of taste or smell) we ask that you not come to camp.

WHAT YOU CAN DO TO HELP US:

- Wash your hands frequently and use the provided hand sanitizer in between washings.
- Wear a mask while inside a building's common area .
- Spend lots of time outside - it's good for you!
- Stay in small groups and distance yourself from others by 6 feet or more.
- Only go into buildings or dining rooms reserved for your group.
- Ask your group not to interact with any other small groups that may be on site. We want to minimize overflow between groups.
- Don't touch surfaces you don't need to touch (e.g. refrain from using hand-rails if you don't need them for balance).

We look forward to providing you with a break from your recent routine! And thank you for helping us keep this "place apart" safe and healthy for everyone.
